

# Drive Smart

Laminate glass constructed with Butacite and protected with Windshield Skin™

## TECHNOLOGY

Proline Styling Windshield Skin™ was created to provide state-of-the-art protection for your vehicle's windshield. Windshield Skin™ uses the latest nanotechnology to create a stronger windshield surface and prevent damage to one of the most important parts of your vehicle.

### How are windshields made?

Early windshields were made of standard glass which led to serious injuries in a vehicle crash. These were replaced with windshields made of thermal or chemically treated glass and were fitted into the vehicle frame using a neoprene or rubber seal. This tempered glass shattered into many, mostly harmless, fragments when the windshield broke. These windshields however, could shatter from a simple stone chip. The primary force behind windshield innovation has historically been the need to prevent injury from sharp glass fragments. Today, two thin sheets of curved glass are fused to a polyvinyl butyral (PVB) inner layer. The tempered glass layers are maintained independently to create a dual layer of protection. When debris hits the glass hard enough to break both outer and inner layers, the tough membrane prevents the glass from falling apart into the vehicle itself. Modern windshields, now almost universally required in all nations, do not fragment, but tend to stay in one piece, even if broken, except, if pierced locally by a strong force. Further, shards or glass from the inner lamination stick to the membrane, keeping them from spinning away from the vehicle and possibly damaging other vehicles or environment.

### Applying Proline Styling Windshield Skin™

Our Windshield Skins™ are a unique, multi-millimeter layer of protection which bonds to the exterior windshield glass layer. This additional layer strengthens and improves the durability and performance of the windshield for safety and security.

## Drive with Protection

### Proline Styling Windshield Skin™ FEATURES & BENEFITS

The Proline Styling Windshield Skin™ absorbs the impact of standard road hazards, protecting you and your driving vision, keeping your glass in pristine condition.

#### ADDITIONAL BENEFITS:

- Reduces glare - enhances your driving view
- Scratch-resistant - stands up to everyday abrasions including windshield wipers
- UV Stabilizers - reduces heat levels in your vehicle making you more comfortable AND prolonging the life of your vehicle's interior
- Thermally Fitted - customized for your vehicle's windshield curve and size to provide maximum protection
- Guaranteed not to crack, peel, bubble or yellow

## Drive with Confidence

### Proline Styling Windshield Skin™ WARRANTY

If your windshield does sustain damage, the Proline Styling Windshield Skin™ Limited Warranty:

- Covers the cost of necessary repairs
- Provides for a windshield replacement (when necessary)
- Replaces the windshield skin on your vehicle

Proline Styling Windshield Skin™ includes a 2 year 24,000 mile warranty. Terms and conditions apply. Ask your retailer for additional information.

Protect your windshield with the only optically-clear protection film available today - Proline Styling Windshield Skin™!

## Drive with Safety

### Proline Styling Windshield Skin™ SAFETY

Windshield damage is not just frustrating, it can be dangerous! Windshield strength and reliability are compromised when the glass has cracks or chips. A rock or debris impact can hinder the windshield's ability to sustain the crushing forces of an automobile crash or worse.....keep passengers inside.

In rollover accidents, the windshield is a major part of the structural integrity of the vehicle. The Proline Styling Windshield Skin™ provides an extra layer of strength and safety for you and your passengers.
